Professional Profile

Managed Services Engineer and Boomi Integration Consultant at Yenlo, and a BEng (Hons) Software Engineering undergraduate. I build and maintain Boomi integrations, manage enterprise middleware, and resolve production issues for international customers. Holder of 14 Boomi certifications and the WSO2 Certified Identity Server Practitioner (v7) credential, currently deepening my skills in WSO2 API Manager, WSO2 IAM, Kubernetes, Elastic Stack and AWS to grow into cloud and platform engineering.

Experience

Managed Services Engineer **Apr 2026 - Present**

Yenlo Lanka Pvt Ltd.

- Build, maintain and troubleshoot Boomi integration processes (iPaaS, API Management, Flow) for enterprise customers.
- Investigate and resolve production incidents through Jira, working with both internal teams and external customers.
- Build Elastic Stack / Kibana dashboards and reports for monitoring, error tracking and token-migration visibility.
- Support WSO2 API Manager, Identity Server and Micro Integrator environments, including assessing security advisories (CVEs).

Managed Services Engineer - Intern **Oct 2025 - Apr 2026**

Yenlo Lanka Pvt Ltd.

- Provided day-to-day managed-services support: monitoring integrations, analysing process logs, and fixing failed executions.

Integration Consultant - Intern **Apr 2025 - Sep 2025**

Yenlo Lanka Pvt Ltd.

- Developed and tested Boomi integrations and APIs; earned four Boomi certifications during the internship.

Education

BEng (Hons) Software Engineering **2023 - 2027**

University of Westminster - Informatics Institute of Technology (IIT), Colombo

G.C.E. Advanced Level (2023) - 1B, 1C, 1S (Biological stream)
Maliyadeva Girls' College, Kurunegala

G.C.E. Ordinary Level (2019) - 9As
Maliyadeva Girls' College, Kurunegala

Certifications

WSO2: Certified Identity Server Practitioner (v7) - Oct 2026

Boomi (14):

- Professional: Integration Developer, API Design, API Management, DataHub, Linux Operational Administrator, Windows Operational Administrator
- Associate: Integration Developer, Integration Architect, Administrator, Flow Essentials, EDI for X12, DataHub, Runtime Architect, Event Streams

Other: HackerRank - Java (Basic), Problem Solving (Basic); LinkedIn Learning - Career Essentials in GitHub, Node.js, React, Spring Boot 2.0, Postman

Projects

pocket-sage - Privacy-Preserving AI Knowledge Assistant (Individual) **Ongoing**

USING Python, FastAPI, LangChain, ChromaDB, Ollama, GitHub Actions

- RAG chat app over PDFs, Word files, URLs and text, with local-first LLM inference (Ollama) or OpenAI.
- Security by design: JWT auth, encryption at rest, PII scrubbing (Presidio), hashed audit logs; CI/CD with CodeQL, Dependabot and Trivy.

WSO2 IS Token Audit Logger (Individual) **2026**

USING Java, OSGi, WSO2 Identity Server 7.1.0

- OSGi extension for WSO2 IS that logs the client ID and grant type of every issued and refreshed OAuth2 token

for auditing.

SpeakMe - Cursor Colombo Buildathon 2026 (Team) **2026**

Audio & Voice AI track - USING ElevenLabs

- 24-hour build of a real-time voice restoration platform for people with progressive speech loss, using voice cloning, a family access system and emergency alerts.

Election Voting System - BlockBallot (Group) **Oct 2024 - 2025**

(Contribution - Front-End Development) - USING Blockchain, React, Java, Spring Boot, SQL

- Secure blockchain-based voting system to replace Sri Lanka's paper-based elections, with QR-code authentication and automated tallying; showcased at Cutting Edge '25.

Real-Time Event Ticketing System (Individual) **Oct 2024 - Dec 2024**

(Contribution - Full-Stack Development) - USING Java, React, Spring Boot, SQL

- Multi-threaded simulation of concurrent ticket sales and releases, keeping data consistent across threads.

Ceylon Agricare (Group) **Sep 2024 - Oct 2024**

(Contribution - Front-End Development) - USING Ballerina, JavaScript, HTML, CSS

- Web app for sustainable agriculture with a marketplace, weather updates and loan-scheme information for farmers.

More on GitHub: Hotel Booking Website (PHP, MySQL), Responsive Book Website, Plane Management System (Java), Student Progression System (Python).

Technical Writing (AWS Builder Center & Medium)

- The 5-Step Routine I Use When Something Breaks in Production - AWS Builder Center (Oct 2026)
- How AWS and the Elastic Stack Work Together - AWS Builder Center (Sep 2026)
- From an Incident Ticket to Understanding the Whole Stack - Medium (Jul 2026)
- AI Agents Are Coming for Integration. Here's What That Actually Means. - Medium (May 2026)
- Why Logs Became My Best Friend in 2025? - Medium (Dec 2025)
- Unlocking the Invisible Gatekeepers of Login, From Basic Auth to Okta MFA - Medium (Dec 2025)
- Before You Learn Integration, Meet the Giants You'll Be Connecting - Medium (Nov 2025)
- The Hidden Technology That Makes Apps Talk to Each Other - Medium (Nov 2025)

Achievements

- **Finalist**, Innovate with Ballerina - IEEE SB, University of Moratuwa, with WSO2 (Team BalletCoders).
- **Top 10 of 40 teams**, CodeRally 5.0 24-hour hackathon - IEEE CS Student Branch Chapter of IIT (Team DevDynamos-CR013).
- **Exhibitor**, Cutting Edge '25 (Temple Trees, June 2025) - presented BlockBallot.

Leadership & Volunteering

- Industry Outreach Team Lead, IEEE WIE Student Branch of IIT - (2024-2025)
- Industry Outreach Team Member, CodeRally 5.0 - IEEE CS Student Branch Chapter of IIT - (2024)
- Live Presenter, iTV team - Cutting Edge '24, IIT annual exhibition - (2024)
- Member of the IEEE Student Branch, CS Chapter and WIE of IIT; Member of the Leo Club of IIT - (2023-Present)
- Secretary of the School Quizzers' Association Sri Lanka - (2023-2024); President of the Quiz Club of Maliyadeva Girls' College - (2020-2022)
